Your new site will display perfectly on mobile phones

The fast and easy way to get mobile enquiries

Perfect if you are in a hurry or do not yet have the time or budget for a fully responsive website  
(Unlike pure mobile sites, responsive sites look good on tablets, phones and desktop computers)

Mobile standalone sites are also very handy if you want a secondary niche site or temporary site while your fully responsive site is developed.

*Note: This is NOT a custom desktop website, it will show on desktop computers if you have no full site, it is a basic site specifically built to work well on mobile phones, we can add a code to your existing site to redirect mobile traffic to your mobile one. If you want a desktop/mobile hybrid site check-out our [Fast Starter](#) & [Booster Sites](#)*

## What you get with your package

- **Your logo and colour scheme** added to a mobile website template.
- **One page site**, select from templates available.
- **Full Support** - Get support via help ticket or a 24/7 emergency hotline
- **New Domain Name or mobile redirect** to send mobile visitors to the new mobile site
- Includes **Hosting of your mobile website**, no extra charges, This basic package does not include our Fast Starter hosting packages which can be added on if needed
- **Standard email setup 3 email addresses**, unlimited forwarders, or forwarded to your usual email address
- **Optional Gmail/Google Apps Email @yourdomain** set-up \$5 per month per user
- **Guaranteed 72\* hours to see your site live** from the point we get your first payment and the info we need to set your site up, \* weekday turn-around  
*\*12 month minimum contract, payable quarterly in advance, if cancelled during this period there are no refunds but we can redirect the mobile traffic to your new responsive site if needed.*
